

THE HAVIS DIFFERENCE

WHO WE ARE

The Havis legacy dates back over 80 years as a trusted designer, manufacturer, and provider of mission critical equipment. Havis is the leader in high-quality, rugged & innovative products for mobile workers.

Our ergonomically designed solutions maximize productivity & comfort without sacrificing quality, reliability, or durability for public safety, military & government, utility & public works, transportation, material handling, and other demanding environments.

We partner with leading automotive and technology companies to provide safe, dependable solutions for a wide variety of vehicles and computing devices. Our suite of fleet products is designed for popular public safety SUVs, sedans and, trucks and we have the capabilities to support specialized projects for any vehicle.

ENGINEERING CAPABILITIES

Havis continues to invest in equipment to maximize accuracy & improve efficiency. The engineering department uses the latest technology in 3D scanning & printing.

We have a portable 7-axis scanner capable of both tactile probing & non-contact scanning, while our FDM 3D printer allows us to print a wide variety of materials. Both of these items enable Havis to provide superior products in fast & efficient manners.

SUPPLY CHAIN

Havis is a vertically integrated company that fabricates our own sheet metal parts and injection molded plastic parts. Our ISO-9001 facility designs, engineers, assembles, and warehouses thousands of Havis products every day to support customers.
